Subject: Anti-trust lawsuit by various states

The States Attorneys General who involved themselves in the Justice Dept. lawsuit against Microsoft bring nothing to the table. They are in it for the publicity and because they have nothing to lose. They are still giddy from the windfall they got from their tobacco settlement and hope to extort money from Microsoft. I am a consumer and I have benefitted enormously from the products that Microsoft has created. These greedy attorneys general should be thrown out of court. They are contemptible extortionists who deserve no credibility. Sincerely, James A. McGrath
